

The Solar System

It's important that, as we start our space topic this term, we know the order of the planets as they get further away from the sun.

To help you remember this, you're going to make up a mnemonic where each word in the sentence begins with the first letter of each planet in the correct order – have look at the example on the next page..

The first letter of each planet gives us **M V E M J S U N** so our mnemonic could be:

My **V**ery **E**xcited **M**other **J**ust **S**aw **U**nderground **N**ewts!

Mercury: M _____

Venus: V _____

Earth: E _____

Mars: M _____

Jupiter: J _____

Saturn: S _____

Neptune: N _____

Have a go at creating your own mnemonic.

Present your mnemonic to the best of your ability, on either paper or on the computer and upload to the website. Include pictures of Space, the Solar System or the planets to help in your presentation.
