

Los Colores

Think about colour mixing when you are painting. When you mix different colours together, you make new colours, for example red and blue paint mixed together would make purple (a secondary colour).

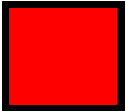

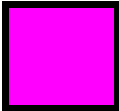

Look at the puzzle below. Can you colour the boxes the correct colour, then work out what colour would be made if you mixed the two colours together?

Write the name of the colour in Spanish and then colour in the last box. The first one has been done for you.

rojo + blanco = rosa

red + white = pink

Use the coloured balloons as a reminder of the Spanish words for each colour.

rojo  + blanco  = rosa 

negro  + blanco  = 

azul  + amarillo  = 

rojo  + azul  = 

rojo  + amarillo  =
