Paraphrase adds extra information to a sentence or a paragraph but the passage should still make sense without it. Paraphrase is the information inside the brackets e. g. ( \_\_\_\_\_ )

Here's an example:

**Without brackets:** 'James was taking part in a charity skydive at the weekend.'

**With brackets:** 'James (who was terrified of heights) was taking part in a charity skydive at the weekend.'

The sentence still makes sense without the words inside the brackets, it's just a bit more interesting with the added detail.
